#### MARKET REVIEW

The PSEi gained 5.44% in September to close at 7,272.65 level as foreign investors continued to buy into the local market after the US federal reserve (FED) cut policy rates by 50 basis points to 5%. BSP also announced a 2.5% cut in the reserve requirement ratio effective October 25 which was a positive surprise to the market. This move benefits the local banks and provide more liquidity in the financial market. September inflation declined further to 1.9% from 3.3% the previous month, beating expectation of 2.5%. Food prices and transport led the decline in inflation. After breaking the above the 7,000 level, the PSEi may attempt to break above the 7,500 level in the coming months as investor sentiment has turned positive following the rate cuts of the BSP and the US Fed.
